

Who is OTTI?

Meet the three OTTI colleges:

The OTTI college's 20-strong team proffers seminars, specialist forums and conferences that are well known and respected nationwide and abroad. About 5000 experts and managers from business, administration and science participate in our seminars every year.

The ENERGY COLLEGE is the leading organiser of purpose-oriented seminars and conferences in the field of renewable energy in the German speaking area.

Furthermore, we offer courses in the fields of building, construction and the efficient use of energy. Our conferences with the accompanying specialist exhibition in Kloster Banz belong to the definitive meetings of the solar energy sector in the German- speaking area.

The MANAGEMENT COLLEGE offers a wide range of events on subjects including management training in business administration and project management.

The TECHNOLOGY COLLEGE offers numerous seminars on subjects including electrical engineering, methods of production, as well as measuring and controlling technology.

The experience of our team, complemented by the know-how of experts from economics and science, guarantees high quality, user-orientated and commercially independent courses. The many years of co-operation with the reputed institutes and companies as well as our consulting activities ensure our events offer the most up to date and demand-orientated topics.

Our seminars and conferences are not only places for updating your knowledge but also a meeting place: the seminars and conferences offer you topical lectures and the latest information; shared mealtimes, tours and entertainment programmes enable you to get to know people and to discuss specialist issues with the lecturers and other participants.
